

Theo Steinstrasser

647-982-6036 | steinstrasser@gmail.com | Waterloo, ON | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Education

Wilfrid Laurier University

Sep 2021 – May 2027 (Expected)

Honours Bachelor of Science in **Computer Science**, Big Data Systems Concentration

Waterloo, ON

Relevant Coursework: Algorithms, Data Structures, Software Engineering, Databases, Machine Learning, Computer Networks

Experience

Prolenium Medical Technologies

May 2023 – Aug 2023

IT & Technical Intern

Richmond Hill, ON

- **Built** a **SQL + Python** onboarding automation workflow, improving HR data processing efficiency by **30%**.
- **Configured, deployed, and troubleshot** Windows workstations for **50+** employees, reducing setup time by **25%**.
- Resolved hardware, software, and enterprise IT issues across internal systems and Zoom infrastructure.
- Collaborated with interns to improve internal IT tooling and documentation.

Projects

MatchIQ — Sports Prediction Platform | [React](#), [Node.js](#), [Express](#), [Supabase](#), [PostgreSQL](#), [Groq AI](#) | [Live](#) | [GitHub](#)

- **Built** a full-stack sports prediction platform covering **9 competitions** including the 2026 FIFA World Cup simulations, with live fixtures, standings, and matchday views.
- **Implemented** a **Dixon-Coles Poisson model** with a dynamic **ELO rating system** trained on **49,000+** international results for probabilistic scoreline and tournament reach predictions.
- **Designed** a pre-tournament prediction audit system using **Supabase**, enabling live accuracy tracking with **Brier score**-based calibration metrics.
- **Deployed** a full-stack prediction platform to **Render** and **Vercel** with in-memory caching, push notifications, and **Groq AI**-generated match previews.

Collab — Full-Stack Project Management Platform | [Next.js](#), [Supabase](#), [PostgreSQL](#), [Groq AI](#), [TailwindCSS](#) | [Live](#) | [GitHub](#)

- **Built** a full-stack project management platform with **kanban boards**, real-time comments, and file uploads deployed for real project collaboration workflows.
- **Integrated Groq AI** (Llama 3.3) for automated task generation with rate limiting across all API endpoints.
- **Implemented** real-time activity feeds, notifications, and online presence tracking using **Supabase** subscriptions across concurrent users.
- **Designed** a **PostgreSQL** schema with **Row Level Security** enforcing per-user data access and email-based team invites via **Resend**.
- **Shipped** global **Cmd+K search**, onboarding flow, and mobile-responsive UI deployed to **Vercel** with protected middleware routes.

Linktab — Link-in-Bio SaaS Platform | [Next.js](#), [Supabase](#), [PostgreSQL](#), [TailwindCSS](#) | [Live](#) | [GitHub](#)

- **Built** a link-in-bio SaaS platform where users get a public profile page at `/username` with a custom link editor.
- **Implemented** click tracking by logging every link interaction to **PostgreSQL**, aggregating into a **7-day analytics dashboard** with per-link breakdown.
- **Designed** dynamic public routes using **Next.js App Router** with per-user **Row Level Security** — profiles public, dashboard private.
- **Deployed** to **Vercel** with client-side auth, protected dashboard routes, and a profile settings editor for display name and bio.

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, HTML/CSS

Frontend: React, Next.js, TailwindCSS, Vite

Backend: Node.js, Express, FastAPI, REST APIs

Databases & Cloud: PostgreSQL, Supabase, Vercel, Render

Data / ML: PyTorch, Scikit-learn, Pandas, NumPy

Tools: Git, VS Code

Certifications

IBM SkillsBuild — IT Accelerator Program, ACCESS Employment | 2025

- Data Fundamentals, Cybersecurity Fundamentals, Artificial Intelligence Fundamentals, Web Development Fundamentals
